In case of chemical spill

1. Evacuate the lab. Leave the room and close the door behind you.

2. Take care of immediate injuries or spill on people. Call for help! Use protective equipment when necessary.
   (info about available equipment on separate note)

3. Shut down the area. Put up big visible notes:
   - on the door to the lab.
   - on entrance to corridor telling which lab had the accident.

4. Let people in adjoining labs know about the spill.
   (fumes can spread through ventilation)

5. Find Safety Data Sheet.
   - KLARA-database:
   https://secure.port.se/alphaquest/app_uu/pcmain.cfm
   (quick link available at www.ebc.uu.se/internt)

6. Contact a Chemical Advisor.
   (see separate note for list of names)

7. For cleaning up hazardous spills, call Relita.
   - If you are not certain, better call them!
   - Relita wants the Safety Data Sheet, keep it handy.

SOS Alarm:	(00) 112
Relita:	(00) 0771-103 500
